# Sean Richard.

I build the systems behind operators who need to scale.

Fractional CMO/CTO, AI automation, and contractor SaaS — designed and deployed inside live businesses, not theory decks. I own four operating companies. The systems get tested before they get sold.

Founder × 2

01 STACK

PRODUCTION

● FRONTEND

Next.js 14 · React 18 · TypeScript · Vite · Tailwind · Redux Toolkit · Zustand

● BACKEND / DATA

Node.js · Supabase (Postgres, auth, RLS) · REST APIs · server-side scripts

● AI / LLM

User-facing LLM features · agent design · prompt engineering · eval-driven CI/CD · voice agents

● INTEGRATIONS

Twilio · Stripe · Mapbox · email infra · document/PDF pipelines · third-party CRMs

02 SELECTED PRODUCTS

0→1 · BUILT & SHIPPED

LyncBot v3

AI WORKFLOW APP

Next.js 14React 18TypeScriptNode.jsSupabaseNetlify

→ Designed and shipped an AI workflow application for business communication and automation, owning the full stack from UI to data layer to deployment.

→ Built user-facing LLM features with eval-driven iteration: prompt versioning, output validation, and CI checks before deploy.

→ Hardened reliability with strict TypeScript, linting, and pre-deploy verification; deployed via Netlify.

BuilderLync

CONTRACTOR SAAS

ReactTypeScriptViteSupabaseRedux ToolkitZustandTwilioStripeMapboxRecharts

→ Founded and built a contractor-focused SaaS unifying CRM, estimates, scheduling, marketing automations, document handling, dashboards, and AI assistants in a single product.

→ Implemented complex UI surface area: drag-and-drop workflow builders, dynamic forms, charts, PDF export, mapping, and rich state management.

→ Owned product architecture, technical direction, and iteration cycles informed directly by contractor user feedback.

INTERNAL PLATFORM

React

TypeScript

Vite

Supabase

Document parsing

Rich text

Flow diagrams

- Built an internal-tools-as-product platform that converts manual operational processes into structured workflows and AI-assisted automations.
- Shipped document and PDF parsing pipelines, rich-text editing, visual flow builders, and analytics surfaces backed by Supabase.

## 03 EXPERIENCE

2007 → PRESENT

MAR 2025  
— PRESENT  
DELAWARE, US

### Founder & Product Architect

BuilderLync Inc.

FOUNDER  
FULL STACK

- Lead product, engineering, and GTM for a contractor-focused SaaS platform modernizing trades operations with AI assistants and workflow automation.
- Architect platform modules across CRM, estimates, scheduling, marketing automation, and dashboards.
- Drive investor relations, partnerships, and positioning while remaining hands-on in product specs and implementation.

NOV 2017  
— PRESENT  
FLORIDA, US

### Founder & AI Systems Architect

Autom8ion Lab Sitehues Media Inc.

FOUNDER  
AI SYSTEMS

AI systems shop building agent-driven workflows and LLM-powered tooling for service businesses. Sitehues Media is the parent holding company over Autom8ion Lab + digital agency services.

- Build and ship AI-powered automation systems across content workflows, ad/CRM operations, lead handling, reporting, and customer communication — with prompt iteration and eval checks before deploy.
- Map manual processes, design automation architecture, integrate CRMs and external services, and deploy tailored systems into live production.
- Own discovery, scoping, technical execution, QA, and handoff for each engagement.

## Fractional Leadership ACTIVE × 3

CURRENTLY ENGAGED

Three concurrent fractional executive seats across contractor businesses — operator-side context that feeds directly back into BuilderLync's product direction.
